CAREER OBJECTIVE

Motivated MCA student specialising in Artificial Intelligence and Machine Learning, with a strong foundation in Python and a growing command of Data Structures & Algorithms in C++. Driven by a deep interest in building intelligent, memory-efficient systems that bridge algorithmic thinking with real-world AI applications. Seeking opportunities to apply and expand these skills in a challenging environment where I can contribute to impactful, data-driven solutions.

EDUCATION

Master of Computer Applications (MCA)

08/2025 – 05/2027

MIT World Peace University - Pune, Maharashtra

Electives: Artificial Intelligence & Machine Learning

Bachelor of Computer Applications - AI & IoT

07/2022 – 05/2025

ICFAI University - Jaipur, Rajasthan

Percentage: 74.50%

TECHNICAL SKILLS

Languages

Python, C++

Core Concepts

Data Structures & Algorithms (C++) - In Progress

Python Ecosystem

Pandas • NumPy • Matplotlib • File I/O • OOP • APIs

AI / ML

Machine Learning Fundamentals • Supervised & Unsupervised Learning • AI Concepts

Mathematics

Statistics & Probability • Analytical Problem Solving

Developer Tools

Git • GitHub • VS Code

PROJECTS

Food Delivery Time Prediction

Python Machine Learning

GitHub: github.com/MANANSHARMA275 🔗

- Built a live Food Delivery ETA prediction system using a CatBoost model with geo-intelligence and input validation.
- Used real-world features including delivery partner age, rating, vehicle type, order type, restaurant & delivery coordinates, and route distance to predict delivery time.
- Implemented distance calculation, coordinate quality validation, and distance category classification to improve model accuracy.

CERTIFICATIONS

Machine Learning with Python - IBM / Coursera

Verified Certificate | Credential: Manan Sharma | Issuer: Coursera / IBM | October 2024 ~20 hours |

Mastering Data Structures & Algorithms using C and C++

Udemy | Instructor: Abdul Bari
Sep 2025 – Present

100 Days of Code: The Complete Python Pro Bootcamp

Udemy | Instructor: Dr. Angela Yu
Feb 2026 – Present

ACHIEVEMENTS & ACTIVITIES

- Participated in multiple hackathons - collaborated in time-boxed, team-based problem-solving challenges, demonstrating rapid prototyping and adaptability.
- Currently enrolled in 100 Days of Code: The Complete Python Pro Bootcamp — Dr Angela Yu (Udemy, Feb 2026 – Present) -intensive project-based course covering data manipulation, OOP, APIs, and automation.
- Actively strengthening DSA proficiency in C++ with a goal to build memory-efficient AI solutions that combine algorithmic thinking and Python ML pipelines.
